

# VIRTUAL CHOIR VIDEO TIPS FOR SINGERS

HOW TO RECORD A GREAT VIDEO

## PREPARE FOR VIDEO RECORDING

---

Choose a good spot and...

- Wear neutral clothes (no images, no logos), preferably dark colors
- Place camera at eye level
- Be sure that camera points to your upper body
- Remove unwanted background objects

## MAKE SURE THERE IS GOOD LIGHTING

---

Put lights in front of you

Bright backgrounds mean dark faces, so be sure that main light source is in front of you.

No open windows or lamps must be in the scene and turn on room lights.

## AIM FOR A BETTER AUDIO

---

Listen to backing tracks with earphones, plus...

- Tell you roommates (and/or pets) that you're about to take some recording sessions, so they won't interrupt you and they won't make loud noises.
- Turn off any noise source
- Don't apply any effect to your audio, they will be added during editing
- Try to record yourself and listen to your voice volume: it has to be at proper level to be heard

## BONUS TIPS

---

Sing as if you were singing along with the choir

Try as much as possible to sing in tempo, loopy executions won't fit well in virtual choirs
